DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group 2, claims 17-22 in the reply filed on 6/29/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election **without traverse** (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Evans et al (US 2002/0188276).

Evans discloses a method for the treatment of venous stasis (see paragraphs 3, 4) having the limitations as recited, including: advancing an elongated intraluminal member 34 or 98, i.e., the intraluminal member can be an infusion wire 98 or a balloon catheter 92 which goes through a vein to a treatment site, activating the intraluminal member for disruption of the treatment site (see paragraphs 76, 77, and injecting sclerosing agent, i.e., as saline into the vein (see fig. 1, col. 8, paragraph 82, and where due to manipulation vessel with catheter or guidewire which would cause spasms in the vein.
